***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 9/20/06 has been entered.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 25 – 28, 30, 32, 34, and 36 – 37 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S patent 3,252,493 to Smith.

With regard to claim 25, Smith teaches, in both figures 6 and 9, a dual bushing installation comprising outer metal bushing 23 (fig 6) with outer flange located numeral 23 in the figure; inner bushing 11 with the flange located near numeral 11 and located near the second opening.

With regard to claim 26, note that the circumferences are diameters.

With regard to claim 27, note structural work member 14.

Art Unit: 2616

With regard to claim 28, since the bushings are made of metal, the amount of radial displacement would inherently depend on the modulus of elasticity and ultimate strength.

With regard to claim 30, see figure 3.

With regard to claim 32, see the rejection of claim 25 above.

With regard to claims 34 and 36 - 37, see the rejections above.

4. Claim 31 is allowed.
